

[Dr Tanja Petrović](#)

Head of the Institute of Culture and Memory Studies

Research Centre of the Slovenian Academy of Sciences and Arts

This volume offers its readers a fresh and comprehensive understanding of computer-mediated socially unacceptable discourses and their linguistic features. One of the important qualities of this volume is that it brings together different approaches to language research: research language structure and language use/discourse, quantitative and qualitative approaches, corpus-based methods and content analysis, as well as mixed methods approach. The integration of methodologically diverse approaches is the best way to reveal the complexities of the linguistic analysis of negative online behaviour.

The monograph's content is presented in a comprehensive and clear manner. The chapters are written in appropriate language, and the authors skilfully use linguistic terminology and contribute to its refinement. Because of its comprehensiveness and clarity, and because it addresses a timely and relevant issue of socially unacceptable online communication, and offers broadly relevant insights that will be valuable source of knowledge about socially unacceptable online communication, this monograph will be a relevant read for researchers as well as students from various fields and subfields – linguists, scholars in media studies, cultural studies, social psychology, sociology. It will also be of interest for media practitioners and policy makers in the fields of media and public communication, and related legislation. Not least, it could find its readers among general interested public.
